

Passerby Student (1)

- Q1. I've used it before. I need it to get to campus from my apartment.
- Q2. I mainly walk to the same hub outside my apartment. If I'm leaving campus though, I'll try to use the same bike. Sometimes I can't find it though and end up looking around or walking.
- Q3. I'd want it to be on the way to where I'm trying to go, you know? Don't want to waste my time going across campus to get a bike.
- Q4. Probably a list of nearby bikes, since my main issue is just finding the bikes when I'm leaving.
- Q5. I mean I'd like it to be as soon as possible. When I'm leaving class I have to get back in time to eat dinner and study, so saving as much time as possible would be nice.
- Q6. If the data isn't there isn't the app just not functioning? Probably a warning on that.

Passerby Parent (2)

- Q1. I haven't used it before actually. I'm here to visit my son and check in on him, and since he has a bike I needed one too.
- Q2. I mainly want to know if the bike is still there, or if the hub is empty.
- Q3. Road blocks. With all the construction happening it was hard to find one near my AirBNB that I could get to easily.
- Q4. Both is good.
- Q5. Obviously the sooner the better, but realistically the data probably takes some time to update, so maybe 10 to 15 minutes?
- Q6. A giant red popup saying the data is unavailable.

Passerby Student (3)

- Q1. I use it all the time going to the grocery stores! The basket is nice for holding some bags.
- Q2. Probably how gross the bike is? I don't wanna get a bike that's messed up and smells funny.
- Q3. Maybe how long it hasn't been used? I don't wanna have to chat with someone getting off the bike or struggling to pay.
- Q4. Map obviously, the main reason why I use it is to see where things (the bikes or hubs?) are.
- Q5. Like for the app to know? Maybe 2 minutes? But that's not something that can be messed with is it?
- Q6. Just don't let me see the bike if it's not available! Or maybe a color coded bike pin?

Passerby Student (4)

- Q1. Yeah, I use it when I oversleep. It's faster than waiting for the bus when I'm rushing to an 8 AM.
- Q2. I need to know if the bike is actually functional. Nothing worse than walking out of your way just to find a bike with a flat tire or a broken pedal.
- Q3. If someone else is already walking toward it. Like, a reservation system or a "high demand" warning so I don't race someone for it.
- Q4. Map view, definitely. I need to see the spatial layout of where I am versus where the bike is hidden.
- Q5. Under 5 minutes. If it's longer than that, someone else has probably already taken it.
- Q6. A grayed-out icon on the map with a "Connection Lost" banner at the top of the screen.

Passerby Student (5)

- Q1. No, I usually just skateboard everywhere. It's cheaper and I don't have to worry about finding a parking hub.
- Q2. How much it costs per minute. I'm on a pretty tight budget, so if it's too expensive, I'll just keep skating.
- Q3. The closest drop-off hub to my actual destination. I don't want to arrive and realize the nearest hub is a 10-minute walk away.
- Q4. A list of nearby bikes, sorted by distance. Just tell me how many meters away it is.
- Q5. Real-time would be ideal, so like every 30 seconds.
- Q6. Just a clean notification saying "Network error. Please try again later."

Passerby Parent (6)

- Q1. First time using it today! My daughter goes to school here and suggested we rent them to check out the waterfront trail.
- Q2. I want to know if the bikes are sized for adults or if they can be adjusted easily. My back isn't great.
- Q3. Safe route suggestions. I don't know the local traffic patterns, so I'd love to know which streets have dedicated bike lanes.
- Q4. Both. The map helps me navigate, but the list lets me see the exact numbers of available bikes at a glance.
- Q5. Every 10 minutes seems reasonable for a system like this.
- Q6. A clear warning text box that says "Server Offline: Bike availability may not be accurate."

Passerby Student (7)

- Q1. I use it on weekends when I'm going out with friends. It beats paying for an Uber.
- Q2. Battery status if they are e-bikes. I don't want to get stuck pedaling a heavy dead bike up a hill.
- Q3. Is the hub full? If I'm riding there, I need to know if there's an open slot for me to lock it into.

- Q4. Map. It's just way more intuitive for me to look at a visual layout.
- Q5. It should be instant, but I guess 1 to 2 minutes is acceptable.
- Q6. The app should just show a loading spinner or an offline mode graphic instead of wrong data.

Passerby Student (8)

- Q1. No, I have my own scooter. Too afraid of germs on public bike handles honestly.
- Q2. Cleanliness or a rating from the last user.
- Q3. Weather alerts? Like if it's about to pour rain while I'm walking to it, I'll just grab a bus instead.
- Q4. A list. Maps take too long to load on my older phone.
- Q5. Every 60 seconds.
- Q6. A simple "No bikes found in your area" message if the system goes down.

Passerby Parent (9)

- Q1. I tried it once last semester when visiting. It was fun, but the locking mechanism was a bit confusing at first.
- Q2. Clear instructions on how to unlock it before I even make the trek over there.
- Q3. Walking time to the bike. Let me know if it's a 2-minute walk or a 10-minute walk.
- Q4. Both. I like to see the map for context, but the list tells me exactly what's available.
- Q5. Maybe 5 minutes. It doesn't need to be split-second accuracy for casual riders.
- Q6. A prompt that says "Data outdated. Please refresh or check back soon."

Passerby Student (10)

- Q1. Every single day. It's my primary way of commuting from north campus to south campus.
- Q2. The exact bike ID number so I can find the specific one I reserved in a crowded hub.
- Q3. A countdown timer showing how long my bike reservation is held for.
- Q4. Map. I like seeing the little pins where the bikes are scattered.
- Q5. Within 60 seconds max. People grab these fast between classes.
- Q6. Just change the map icons to question marks or make them invisible so I don't go to a ghost bike.

Passerby Student (11)

- Q1. Occasionally, mostly when it rains and I don't want to walk slowly in the cold.
- Q2. Does it have a front basket? I usually have my backpack and a grocery bag.
- Q3. The safest walking path to get to the bike.
- Q4. A map. I don't know street names well enough for a list to be useful.
- Q5. Around 2 or 3 minutes.
- Q6. An overlay message saying "System Maintenance in Progress."

Passerby Parent (12)

- Q1. No, I prefer walking. I'm a bit intimidated by riding in traffic in a college town.
- Q2. If there are designated bike paths leading from the hub.
- Q3. Are there helmets available nearby, or do I need to provide my own?

- Q4. A map so I don't get lost trying to find the station.
- Q5. Every 15 minutes is fine for me.
- Q6. A clear notification pop-up stating "Connection Error: Unable to fetch live bike locations."

Passerby Student (13)

- Q1. I used it a lot last year, but lately, I've been walking more to get my steps in.
- Q2. Is the seat adjustable? Sometimes they get stuck and it ruins the ride.
- Q3. If the bike has been reported as damaged recently.
- Q4. A list of nearby bikes, because I just want to see what's closest to my current building.
- Q5. 1 minute. Anything slower is frustrating.
- Q6. Just a text banner at the bottom saying "Data may be delayed."

Passerby Student (14)

- Q1. Yes, to get to my off-campus job. It saves me about twenty minutes compared to walking.
- Q2. Is the bike parked legally? I don't want to get charged a fine for retrieving a bike from a forbidden zone.
- Q3. A radar or directional arrow pointing me toward the bike as I get close.
- Q4. Map. It's easier to navigate campus landmarks that way.
- Q5. Real-time. Minutes matter when you're clocked in.
- Q6. A pop-up that says "Failed to load bike status. Please check your internet connection."

Passerby Parent (15)

- Q1. Yes, my son showed me how to use the app today so we could ride around the stadium.
- Q2. Are there multiple bikes together? My son and I need two, so a single isolated bike doesn't help us.
- Q3. A visual confirmation that the bikes we want are still checked in at that location.
- Q4. Both, definitely. The list for quantities, the map for directions.
- Q5. Every 5 to 10 minutes seems reasonable.
- Q6. A big exclamation mark icon on the screen that links to a help page.

Passerby Student (16)

- Q1. No, because the hubs are always empty near my dorm around noon when I actually need them.
- Q2. Predictive data. Like, tell me if bikes are *usually* there at this hour.
- Q3. Notifications if the bike I'm walking toward gets unlocked by someone else before I arrive.
- Q4. Map view. I like seeing the boundaries of the geo-fenced zones.
- Q5. Every 30 seconds. Campus moves too fast for slow data.

- Q6. Hide the map completely and show an error screen so I don't waste my time looking at old info.

Passerby Student (17)

- Q1. Yes, whenever I miss the evening shuttle bus back to my apartment complex.
- Q2. Is the bike headlight working? If it's dark outside, safety is my number one priority.
- Q3. Well-lit walking routes to get to the bike hub at night.
- Q4. List view. I just want to see the address or building name where it's parked.
- Q5. Under 2 minutes.
- Q6. A simple error message like "Bike data currently unavailable. Please refresh."

Passerby Student (18)

- Q1. I used to, but then I bought a cheap bike off Craigslist so I don't use the app anymore.
- Q2. Current pricing and promotions. Sometimes they have student discounts.
- Q3. How many total locks are free at my destination hub so I don't get stuck with an overage fee.
- Q4. Map. It makes it easier to plan my route.
- Q5. 5 minutes max.
- Q6. A color shift on the interface to show it's in "offline mode."

Passerby Parent (19)

- Q1. No, I haven't. Honestly, I didn't know non-students were allowed to use them.
- Q2. How to sign up as a guest without a student email address.
- Q3. Step-by-step walking directions to the physical bike rack.
- Q4. Both. The map gets me to the general area, the list confirms the bike details.
- Q5. 10 minutes is perfectly fine.
- Q6. A message saying "Service temporarily unavailable. Our team is working on it."

Passerby Student (20)

- Q1. Yes, when I have to go all the way across campus to the science labs. It's a long walk.
- Q2. Whether it's an e-bike or a standard pedal bike. I prefer e-bikes when I'm tired.
- Q3. Estimated arrival time if I keep walking at my current pace.
- Q4. Map. I can visually see which side of the street the bike is on.
- Q5. 1 minute. Speed is everything.
- Q6. A toast notification saying "Error updating bike locations."

Passerby Student (21)

- Q1. No, I've heard bad things about the brakes on some of the older models, so I just walk.
- Q2. Maintenance logs or an assurance that the bike has been inspected recently.
- Q3. If the bike is parked on a steep hill or flat ground.
- Q4. List view. Just give me the facts and distances.
- Q5. Every 3 minutes.
- Q6. A banner saying "Live tracking disabled. Showing cached data from [Time]."

Passerby Parent (22)

- Q1. I'm using it today to keep up with my son who is walking fast around campus showing me everything.
- Q2. What the weight limit is on the bikes.
- Q3. Are there any steep hills on the way to the hub?
- Q4. Map view. It helps me stay oriented in a city I don't know.
- Q5. 5 to 10 minutes is completely acceptable.
- Q6. A polite error box saying "We're sorry, bike location services are currently down."

Passerby Student (23)

- Q1. Yeah, it's great for getting to the library late at night when I don't want to walk alone.
- Q2. Is it in a well-lit area? I don't want to walk into a dark alley to unlock a bike.
- Q3. Safety rating of the path or if there are emergency blue lights nearby.
- Q4. Map. Visual context is super important for safety at night.
- Q5. 1 to 2 minutes.
- Q6. A push notification warning me that the app cannot verify bike locations right now.

Passerby Student (24)

- Q1. No, I usually just walk everywhere. Campus isn't *that* big if you cut through the buildings.
- Q2. If there is a special discount or if the first 10 minutes are free.
- Q3. How many calories I'll burn riding it versus walking.
- Q4. A list of nearby bikes, sorted closest to furthest.
- Q5. Every 5 minutes.
- Q6. Just empty out the list and say "No data available."

Passerby Student (25)

- Q1. Yes, I use them to get to the campus rec center when I'm running late for intramural sports.
- Q2. If the bike has any reported issues like a sticky lock or loose handlebars.
- Q3. The exact physical description of where it is (e.g., "Behind the EMU building").
- Q4. Map, because I like seeing the density of bikes in different areas.
- Q5. Every 60 seconds.
- Q6. A dialog box that says "Sync failed. Please check your network connection."

Passerby Parent (26)

- Q1. My husband and I used them yesterday to go get coffee down the street from our hotel.
- Q2. How easy it is to adjust the seat height without tools.
- Q3. A simple map route showing how to walk to the bike rack.
- Q4. Both. We needed to find two bikes close to each other, so the list helped verify quantity while the map gave directions.
- Q5. 5 minutes.
- Q6. A red status bar at the top of the app indicating "Offline Mode."

Passerby Student (27)

- Q1. Yes, mostly during finals week when I'm too exhausted to walk back to my dorm.
- Q2. Is the bike currently reserved by someone else? I hate walking up to a bike only to find out it's locked for another user.
- Q3. Real-time distance countdown (e.g., 50 feet away, 20 feet away).
- Q4. Map, definitely. Lists don't help me visualize shortcuts through campus courtyards.
- Q5. 2 minutes.
- Q6. The bike pins should just disappear from the map entirely if the data isn't reliable.

Passerby Student (28)

- Q1. No, I have a car, so I just drive and park in the student lots.
- Q2. If the bike app offers cheaper parking rates than the campus permits.
- Q3. Traffic updates on major campus roads.
- Q4. List view. It's cleaner and faster to scan.
- Q5. 5 to 10 minutes.
- Q6. A standard error alert: "Unable to connect to the PeaceHealth server."

Passerby Parent (29)

- Q1. I haven't used them yet, but I'm thinking about downloading the app before tomorrow.
- Q2. What the payment options are. Can I use Apple Pay or do I need to type in a credit card?
- Q3. Clear pricing structures so I know what I'm getting into.
- Q4. Both. I want to see where they are located visually, but a list makes comparing options easier.
- Q5. 10 minutes is fine for casual riders like me.
- Q6. A pop-up box with an error code and a "Retry" button.

Passerby Student (30)

- Q1. Yes, whenever I miss my morning alarm. It's a lifesaver for making it to class on time.
- Q2. Is the tire pressure okay? Riding a bike with low tire pressure is exhausting.
- Q3. An alert if another user walks within a certain radius of that specific bike.
- Q4. Map view. It's just what I'm used to with rideshare apps.
- Q5. Real-time or at least every 30 seconds.
- Q6. A banner warning: "GPS data unavailable. Locations may be inaccurate."

Passerby Student (31)

- Q1. No, I live right next to all my classes so I don't really have a reason to ride.
- Q2. If there are bikes available near the campus perimeter for when I want to explore the city.
- Q3. The distance to the nearest bike in steps or minutes.
- Q4. Map view, because it helps me learn the city layout.
- Q5. 5 minutes.
- Q6. A simple "Could not refresh data" message at the top of the screen.

Passerby Parent (32)

- Q1. I used it earlier today. My son recommended it as the quickest way to get across the campus complex.
- Q2. Whether the area around the hub is safe and pedestrian-friendly.
- Q3. Walkways that avoid heavy vehicle traffic or construction zones.
- Q4. Both. The map helps with directions, the list helps verify bike numbers.
- Q5. About 5 minutes seems standard for these kinds of apps.
- Q6. A clear message stating: "System temporary outage. Please try again shortly."

Passerby Student (33)

- Q1. Yes, I use it to go to the pharmacy off-campus when I need to pick up prescriptions.
- Q2. Is the bike clean and free of mud? It rains a lot here and they get messy.
- Q3. If the bike is locked inside a restricted area or behind a gate.
- Q4. Map view, so I can see exactly which side of the building it's parked behind.
- Q5. Every 1 to 2 minutes.
- Q6. A pop-up that says "Data feed interrupted. Please check back later."
